

BORRELL, GOLDEN SPONSOR 2009. 37th Annual Almond Industry Conference.

This year, BORRELL has been GOLDEN SPONSOR at the 37th Annual Almond Industry Conference, held in Modesto, Ca. last December 9-10th.

This time BORRELL has presented the last generation machinery for almond hulling and shelling. New and innovative machinery with improved systems to produce better-quality products and the New Blanching and Processing Lines, all made from high quality stainless steel.

BORRELL's Sales Director, Charles Boddy, delivered a presentation entitled "IMPROVING HULLING AND SHELLING AND INCREASING THE SHARE OF PROCESSED ALMONDS IN EXPORTS WILL BENEFIT THE ALMOND INDUSTRY"

Borrell would like to contribute and be part of the bright future of the California Almond Industry. Improving hulling and shelling with new and innovative solutions will help the industry by producing better-quality products for marketing. In today's markets, increasing the net value of almonds is very important. This can be achieved by increasing the share of processed almonds in overall exports. Borrell has introduced new and innovative ideas in the hulling and shelling process to achieve a better quality of shelled almonds, better handling of stick tights, and improving the ability to work with higher moisture levels. Our company is solid and dynamic with more than 70 years experience. Borrell constantly invests in R&D and high-quality manufacturing equipment.
