
Carob beans shelling line GST-01-40AG

High capacity Carob beans shelling and sorting line

General Description:

High capacity Carob beans shelling and sorting line.

Modular line receives carob beans (*US locust beans) in their pods and delivers pure ground pod and clean beans.

Fully integrated pre-cleaning system. High production and exceptional quality of end products using mechanical and pneumatic separation of pod and beans.

Optical colour sorting system can be installed as integrated module to guarantee quality of beans.
