

Satake UltraScan®

The Satake UltraScan™ is the ultimate solution in high capacity, high efficiency foreign material sorting.

The Satake UltraScan™ is the ultimate solution in high capacity, high efficiency foreign material sorting.

The UltraScan:

- Incorporates multiple wavelength technology that utilizes the infrared and visible spectrums to target all types of foreign material and color defects.
- Uses a newly designed and more powerful version of Satake's proprietary infrared and visible cameras.
- Utilizes a modular design with many of the proven components of the ScanMaster II series for easy

troubleshooting an low maintenance costs.
